Introduction to Odour Control from Plasma Clean

The Ambion utilises plasma ionisation technology, also known as Bipolar Ionisation, to destroy odours present in ambient air. The Ambion 100 is suitable for a range of environments such as restaurant kitchens, refuse storage and public waiting areas.

Simple to install, with low maintenance and running costs, this versatile modular solution provides affordable and reliable odour control, making it the perfect partner for a wide range of applications.

Odour Control with Ambion from Plasma Clean Air

The Ambion is designed to inject charged ions including activated oxygen into rooms of up to 100m² to destroy odours in ambient air. It works by oxidising nuisance smells, leaving the air smelling hygienically clean. The Ambion 100 is suitable for a range of environments such as refuse storage areas, washrooms, hotel rooms, care homes and public waiting areas.

Installation

The Ambion is a plug and play system which is simply mounted on the wall, adjacent to the source of the odour.

Accessories

Spare pre-filters

Maintenance

Over time and dependent on the installation environment, the prefilter of the Ambion 100 can be simply changed. The ionisation tubes are also to be inspected and can be easily cleaned. Both filters and ionisers should be exchanged at regular intervals, depending on site factors.

Warranty

1 year Manufacturer's Warranty ([subject to terms and conditions](#))

Extended 3 year Warranty ([care plan available](#))

Terms

In accordance with our standard terms of business.

Technical Specifications & Data

Dimensions (HWD)	300 x 305 x 100mm
Operation	Adjustable Timer
Power	Up to 45W
Power Supply	230Vac / 1 phase / 50-60Hz
Weight	4kg
Finish	Grade 304 stainless steel
Mounting	Wall or surface mounted
Approvals	Plasma Clean air cleaners comply with current CE requirements and EMC standards. Certificates are available on request.
